

TRUST AND PURITY IN EVERY DROP OF WATER

A Total Water Treatment

Over 70% of our Earth's surface is covered by water. Although water is seemingly abundant, 97.5% is salt water, only 2.5% as fresh water. In that 1% of the fresh water (~0.007% of all water on earth) is accessible for direct human uses.

In this dearth situation, providing pure water to next generation to lead a healthy living is our most essential responsibility rather accumulating more wealth. Team Aqua Technology takes that responsibility from home.

Team Aqua Technology have A Team of experts who possess affluent real time experience in the water purification process. Team Aqua Technology uses wide range of methods with the wholistic approach to deliver a total solution according to the characteristics of source water and severity of contamination.

Reverse Osmosis (RO) Purifier with best in class membrane and ultra filters ensures complete purity and trust in every drop. Fully automatic operation. Eradicate excess salts, bacteria, viruses, pesticides, harmful chemicals, heavy metals, colour & odour from water. Team Aqua Technology ensures trusted care always to its customers by providing quality service with in a least time.
